

Magnetic Teddy for the Fridge

Tools & Materials:

scroll saw

Black Sharpie

Acrylic paints:

Red

White

Brown

Scrap of Ribbon

Round Craft Magnet

Trace pattern onto light cardboard, transfer to 1/4 inch plywood and cut with scroll saw. Dilute brown paint— 1 part paint to 4 parts water. Dip bear into paint covering all sides. Let excess drain and wipe gently with a soft cloth.

Using the picture at the top of this page as a guide, draw the features with the Black sharpie. Use the sharpie also to personalize with "See what _____ Did or See What ____Made. Glue a round craft magnet to the center back of the bear, and glue a small bow to the ear. Use the red paint for the mouth & the white for the dot in the eye.

Use it to hold the child's artwork on the refrigerator.

This is a craft that a child can help make. An adult should cut the bear from the wood. Note: If you don't have a scroll saw, you could make this with a piece of art foam instead.

Use a toothpick dipped in the white paint to put the dot in the eyes.
